

## MAKING BARIATRIC SURGERY ACCESSIBLE...

Bariatric surgery is unlike most operations. It requires careful preparation and education and the best results are obtained with a multidisciplinary team and careful follow-up. This places patients who are living far from the city at a distinct disadvantage.

At Mercy Bariatrics, by working with your G.P and health centre Staff, we have shaped our program to minimise the number of visits down to our centre required before and after surgery without compromising on our comprehensive program.

We are passionate about getting the best results for our patients, and making follow up and assessment easy and accessible via Tele health will help us both to achieve that goal.

Tel Appts: (618) 9272 0400  
Fax: (618) 9272 0450

**CONNECTING THE COUNTRY  
TO OBESITY SURGERY**

Mercy Bariatrics Obesity Surgery Centre, Perth Western Australia is purpose built Speciality Obesity Surgery Centre servicing Perth and all of Western Australia.

If you or someone you know is struggling with severe obesity and suffering from related health conditions, Mercy Bariatrics Obesity Surgery Centre can help!

## HOW DOES IT WORK

Contact your GP. Medicare will now contribute rebate funds for a Telehealth conference arranged through your Regional Health Centre to a Specialist in Perth for the initial Bariatric assessment.

Make a teleconference. Your GP can set up the call using our skype number at their practice often with the support of their practice Nurse.

Visit Mercy Bariatrics. Eventually we will need to see you in Perth for final assessment and for your operation, but by then most of the hard work has been done and you will be ready to go with your surgery!

## PATIENTS WITH ADJUSTABLE GASTRIC BANDS

Not happy with your Band? At Mercy Bariatrics we have specialised in assessing and managing problem bands, to try and get you back on track or revise to alternative approaches if this is not possible. Don't give up on your weight loss dream!

“ I tried dieting and exercise for years and had little success. With Mercy Bariatrics, I took control of my weight for good. ”

## DISCOVER THE BENEFITS

Bariatric Surgery is now recognised as the most powerful and effective approach to the management of Morbid obesity (BMI > 35). It can resolve the comorbidities like Diabetes, Hypertension and sleep apnoea and add quality back to your life.

The new surgery of Lap sleeve gastrectomy is ideal for patients in remote area as unlike a Gastric band it requires no long term adjustments.
